

## CUSTOM FEATURED BUILDING: Beacham Administrative Office— 3,250 square feet

**Administrative Office Building for Beacham Memorial Hospital** features ten offices, a large conference room, huge break room, a copy / work area and plenty of lobby seating area. The floor plan was designed to fit the hospital's need for new administrative space in a separate building. Many hospitals are moving administration areas to on-campus modular buildings and converting inside office space to patient care areas for more revenue.

The exterior of the building features Hardipanel 8" groove siding with bronze windows and Hardi-trim cut on an angle. The overhanging roofline and staggered modules provides some nice angles and shadow lines on the building's exterior. Rose added our signature faux rock panels around the base as a foundation material and faux rock corners to create the illusion of rock pillars. Painted a warm beige color (Sherwin Williams Latte) this building is a professional and welcoming administrative space for the CEO and employees of this hospital in Magnolia, MS.

OUR SIGNATURE STONE SIDING GREATLY  
ENHANCES THE EXTERIOR  
OF THIS BEAUTIFUL BUILDING!
