- Spacious Waiting Rooms
- Functional Receptionist / Billing Offices
- Centralized Nurses Stations
- Private Doctor's Offices
- Sound Resistant Exam Rooms
- Efficient Labs with ample cabinetry
- Acoustical Sound Masking Systems
- Specialty Lead Lined X-Ray Suites

SAVE TIME WITH FACTORY BUILT CONSTRUCTION

Since the buildings are constructed at the factory, your building timeline is not dependent upon the climate or weather. Also, because the factory buys building materials at wholesale pricing, you benefit from the bulk savings.

SAVE THOUSANDS OF DOLLARS

Enjoy decades of use from this built-to-last modular building that is comparable to stick built construction in quality and aesthetics, but much lower in price.

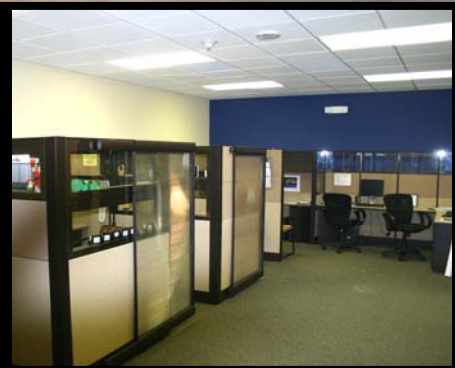

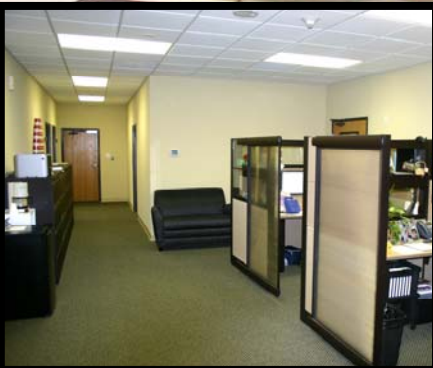

CUSTOMIZE THE LOOK OF YOUR BUILDING

Modular buildings don't have to be cookie cutters. You can customize a floor plan with finishes that will accommodate your needs both inside and out. On-site upgrades such as faux stone accent columns and custom awnings make a bold statement on these beautiful buildings. Whatever your budget or preferences, our design team can work with you to construct an attractive building that you will be proud to have on your campus.

Adding high quality healthcare and administrative buildings to your campus is easy and affordable!

HANDICAP ACCESSIBILITY

Depending on your site conditions, your building can have ground level walk-in entrances. These types of entrances eliminate the need for wood ramps and decks used on most modular buildings. This entrance is handicap accessible and very convenient for your patients.
